## Feed Premix Powder

**Suitable for use in Layer, Broiler and Breeder Feeds where Maize, Soybean, Rice, Wheat, Barely and Oats are Used**

✦ **DIRECTIONS FOR USE**

Thoroughly mix 1000g of B-Murgi Premix into 1 ton feed

To ensure even dispersion of B-Murgi in the total feed, is recommended that 1000g of the premix be first blended with 4 kg feed and this blend be then thoroughly mixed with the remainder of the feed incorporate into mash feed.

✦ **BENEFITS**

- Increase digestibillity of cereals (soyabean, maize, barley, wheat and oats),so to gain higher metabolisable energy.
- The feed costs remain the same but an increase in availability of nutrients contributes to improved animal performance.
- The AME increase can be translated to better feed conversion ratio by 2-5%.
- It can also enable to include more alternative feed ingredients into diet formulation due to enhanced digestibility.
- Improve amino acid digestibility -1 To 2% on the complete diets, such as essential amino acids.
- Reduce gut viscosity and less water consumption.
- Increase dry matter content of manure thus improve litter condition- cleaner eggs and reduced atmospheric ammonia.
- Versatility - one enzyme for all Soybean, Maize, Barley Wheat and oats diets.
- Simple, easy to use - one dosage for all feed types.
- Withstands feed pelleted at high temperature (> 85°C)

NO WITHDRAWAL PERIOD

**STORAGE** : Store in a cool dry place and keep away from direct sunlight.

**PACK SIZE** : 1kg

Best Before 18 months from the date of manufacture

B-Murgi - Premix is a stock feed enzyme with activities obtained from the fermentation of penicillium funiculosum. The main activities are Xylanase & B-glucanase, with secondary activity of cellulases.

## Feed Premix Powder

**Suitable for use in Layer, Broiler and Breeder Feeds where Maize, Soybean, Rice, Wheat, Barely and Oats are Used**

✦ DIRECTIONS FOR USE

Thoroughly mix 1000g of B-Murgi Premix into 1 ton feed

To ensure even dispersion of B-Murgi in the total feed, is recommended that 1000g of the premix be first blended with 4 kg feed and this blend be then thoroughly mixed with the remainder of the feed incorporate into mash feed.

✦ BENEFITS

- Increase digestibillity of cereals (soyabean, maize, barley, wheat and oats),so to gain higher metabolisable energy.
- The feed costs remain the same but an increase in availability of nutrients contributes to improved animal performance.
- The AME increase can be translated to better feed conversion ratio by 2-5%.
- It can also enable to include more alternative feed ingredients into diet formulation due to enhanced digestibility.
- Improve amino acid digestibility -1 To 2% on the complete diets, such as essential amino acids.
- Reduce gut viscosity and less water consumption.
- Increase dry matter content of manure thus improve litter condition- cleaner eggs and reduced atmospheric ammonia.
- Versatility - one enzyme for all Soybean, Maize, Barley Wheat and oats diets.
- Simple, easy to use - one dosage for all feed types.
- Withstands feed pelleted at high temperature (> 85°C).
