Best Reason To Choose For

Optimal Nutritional Balance

Our supplements are expertly formulated to provide a precise balance of essential vitamins, minerals, and nutrients crucial for the overall health and development of cattle.

High-Quality Ingredients

Each component is carefully selected to meet the nutritional needs of cattle, providing a reliable and high-quality supplement for your herd.

Improved Reproductive Health

Foster a successful breeding program with supplements that support reproductive health in both male and female cattle.

Our Animal Welfare Certification affirms our commitment to providing a nurturing and humane environment for the animals involved in the production of our milk supplement.We adhere to strict guidelines and practices to ensure the well-being and proper care of our animal partners. By choosing our certified product, customers not only support their own health but also contribute to the promotion of ethical and sustainable animal farming practices, Our Safety Certification guarantees that our animal milk supplement undergoes rigorous testing for contaminants and meets strict safety standards set by regulatory authorities. From the moment raw ingredients are sourced to the final product packaging, every step of our manufacturing process prioritizes safety and purity. With our Safety Certification, customers can trust that they are consuming a product that has undergone thorough scrutiny to deliver uncompromising quality and peace of mind.

Our promise

We manufacturers of high-quality cattle feed. The BAHC is about 7 years old. It is mainly restricted to dairy. The quality standards of BAHC are high and up to international levels. The BAHC has a modern plant, the latest equipment for analytical procedures and the least-cost ration formulation, and it employs the latest manufacturing technology.
